

Environmental Management Audit - April 2025

Company: First Cry

Standard: ISO 14001 Equivalent

Date Generated: 2025-05-10

Scope of Audit:

- Water management
- Energy management
- Emissions
- Waste management

Executive Summary

This report details the findings of the Environmental Management Audit conducted for First Cry in April 2025. The audit assessed the company's adherence to environmental management practices, focusing on water, energy, emissions, and waste management.

Audit Findings

Based on the assessment conducted, **Minor Issues were Detected** during the Environmental Management Audit. Further details regarding these issues and proposed corrective actions will be provided in a supplementary report.

Key Areas of Assessment:

- **Water Management:** Assessment of water usage and wastewater treatment.
- **Energy Management:** Review of energy consumption and efficiency initiatives.
- **Emissions:** Evaluation of greenhouse gas and other air emissions.
- **Waste Management:** Examination of waste reduction, recycling, and disposal practices.

Conclusion

While First Cry generally adheres to environmental management principles, minor issues were identified during the audit. The company is encouraged to address these findings to achieve full compliance with ISO 14001 equivalent standards.
